PROFESSIONAL SUMMARY

Motivated AI & Data Science undergraduate with hands-on experience in SQL, Python, Power BI, and data analysis workflows. Experienced in data cleaning, exploratory data analysis, dashboard creation, and extracting insights from real-world datasets. Skilled in building analytical projects using SQL, Python libraries, and visualization tools with a strong interest in data analytics and business intelligence roles.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

Vignan's Institute of Information Technology | 2024–2028 | CGPA: 8.4 / 10.0

TECHNICAL SKILLS

Languages: Python, SQL (MySQL)

Visualization: Power BI, Matplotlib, Excel

Libraries: Pandas

Core: Data Cleaning, Exploratory Data Analysis (EDA), ETL, Dashboard Development, KPI Reporting

PROJECTS

Layoff Data Analysis Dashboard

SQL · Power BI · Excel

- Analyzed 2,000+ records of global layoff trends across industries using a SQL-based data cleaning pipeline
- Reduced data inconsistencies by 95% through systematic handling of null values, duplicates, and format issues
- Built an interactive Power BI dashboard with 8+ KPIs tracking company-wise layoffs, industry impact, and temporal trends
- Delivered actionable insights on workforce reduction trends in the tech sector for strategic decision-making

Customer Behavior Analysis Dashboard

Python · PostgreSQL · Pandas · Matplotlib

- Developed an end-to-end customer analytics system to identify purchasing patterns using Python and PostgreSQL
- Performed exploratory data analysis with Pandas to uncover behavioral insights and customer segmentation
- Created visualization reports communicating customer insights effectively to non-technical stakeholders
- Automated ETL workflow for efficient data extraction, transformation, and loading processes

CERTIFICATIONS & ACTIVITIES

- Completed **Data Science Workshop** focused on analytics workflow and visualization techniques
- Actively solving **SQL challenges on LeetCode** — joins, aggregations, window functions, and query optimization
- Self-learned SQL, Python, and data analysis through **GeeksforGeeks** and hands-on project-based learning

KEY STRENGTHS

Fast Learner — Self-taught multiple technologies through independent study and hands-on projects

Problem Solver — Applied real-world data analysis to derive meaningful and actionable outcomes

Results-Oriented — Consistently focused on delivering measurable insights and impactful deliverables

Adaptable — Quick to learn new tools, frameworks, and analytical methods as required
